Production Tools

- Strong and robust, steel constructed wall frame strap brace dispenser
- Designed to handle up to 50m coils of strap brace
- Easy to load, just remove the centre pivot pin and load the bracing in
- Strong rubber wheels with steel bearings
- Built with the same quality construction as all Pryda products

Strap Brace Dispenser

This simple but effective trolley has been developed to allow the safe use of large coils of flat strap bracing in wall framing plants.

It's compact, "mobile" design ensures that the bracing can be easily moved to the required location and removed when finished with.

Replacement of coils is simple and easy; it can be carried out by one operator.

SPECIFICATIONS
