Timber Jointing	<input type="checkbox"/>
Production Tools	<input type="checkbox"/>

OUTRIGGER PRESSING TABLE SUPPORT

- Provides jiggging of joints close to the Stak-Pro boom where standard jiggging may not be possible
- Tracks along the Stak-Pro base rail
- Easily moved to position with heavy duty wheels
- Top box can be rotated to suit top or bottom chord requirements
- Adds versatility to most jigs

REACTION POSTS

- Positioned to allow truss stacks to be uniform with minimal or no operator interference during the stacking process
- Can be used to engage trolleys to prevent accidental movement

TRIANGULAR TRUSS TROLLEYS

- Allows easy movement of completed truss packs from the stacking area
- Minimal space taken when not being used
- Economical
